

Venues, dates and time

CONGRESS Saturday 16 January 2021, 9.00-17.30 CET, online

Pre-congress COURSE Friday 15 January 2021, 15.00-18.00 CET, Webinar

Organizer

Prof. Boris Tutschek, Praenatal-Zuerich.ch, Zürich

Scientific Committee

Prof. Boris Tutschek, Prof. Rizzo, Rome University, and Prof. Tullio Ghi, Parma University, Italy

Registration only via www.islands-group.com

The congress fee is EURO 50,- and includes participation in the Friday course

Broadcast worldwide with satellites in

Zürich – Rome – Parma – Berlin - Trondheim – London – Qatar - Kiev – Tokio – Calgary – Lima – St. Petersburg – Kazan and others

CME credits

6 SGUM credits (equally recognized by DEGUM and ÖGUM) and 10 SGGG credits (Kernfortbildung).

ISLANDS 2021 would like to acknowledge the following supporters:

- ISLANDS-Verein, Zürich
- GE Healthcare (sole ultrasound sponsor)
- ad+pharm GmbH, Hamburg, Deutschland

GE Healthcare

January 2021

Congress Saturday 16 January 2021

Pre-congress Course Fri. 15 Jan. 15.00-18.00

Dear colleagues,

ISLANDS, the International Study group on Labor And Delivery Sonography, encourages and promotes the scientifically funded use of ultrasound in labor and encourages related teaching and research.

ISLANDS is proud to have held its founding meeting in Parma, Italy, in January 2019, and the second meeting 2020 in person in Zürich, in the prestigious ETH. These meeting joined experts in Obstetrics and Maternal-Fetal Medicine who actively apply ultrasound in labor and perform pertinent research. Its purpose was to present new ideas, to share original data and to aggregate people to initiate multi-center studies.

The founders of ISLANDS invite you and hope to meet you online January 2021!

- *Antonino Barbera, USA / Italy*
- *Torbjørn Eggebo, Norway*
- *Tullio Ghi, Italy*
- *Wolfgang Henrich, Berlin*
- *Karim Kalache, Qatar*
- *Wailam Lau, Hong Kong*
- *Christoph Lees, London*
- *Patrick Rozenberg, France*
- *Boris Tutschek, Switzerland*

Congress Saturday 16 January 2021

The congress is intended for exchange of scientific ideas and presentation of new data and hypothesis. The program consists of the short scientific presentations submitted in time for inclusion in the program.

Topics covered include

- Uptake of optional intrapartum ultrasound before instrumental delivery
- Sonographic prediction of outcome of instrumental vaginal delivery using dynamic 2D transperineal ultrasound
- Ultrasonographic prediction of vacuum failure
- Quality control and teaching of rotational forceps delivery: a novel use of intrapartum ultrasound
- Predictive value of angle of progression measurement for a successful vaginal delivery during a prolonged second stage of labor
- Is angle of progression useful to predict intra-operative surgical complications in second-stage cesarean delivery?

Pre-congress course Friday 15 January 2021

ISLANDS core faculty members offer their practical approach to intrapartum ultrasound in a three-hour seminar

How we do US in labor...in Trondheim...in Parma...in Berlin
